

HI EVERYONE and Welcome to Reforest-Action.

We are an international community. A collaborative movement based on Action. We work linking wills and creating networks. Enlivening territories through commitment. With the vision of creating a responsible global culture, one that cares for and protects Native Forests.

We present our next campaign

“100 Days of Reforest-Action”

We start the campaign on the 20th of October 2017 and finish on the 31st of January 2018. We are continuing the work we started in 2016 restoration the territories affected by the catastrophic fire of August 2015, burning 8.500 hectares in Sierra de Gata.

The project takes place in Sierra de Gata, northern Cáceres. Spain. Our headquarters are in Albergue Municipal of Villasbuenas de Gata during the whole reforestation campaign. It is located just behind the Bar Estilo, on the main street crossing the town.

Location:

<https://www.google.es/maps/place/Restaurante+Estilo/@40.1801938,-6.6266915,17z/data=!4m8!1m2!2m1!1sBar+Estilo+villasbuenas+de+gata!3m4!1s0xd3dc3a1dd6c9f5b:0x965cf861e2ea3ae7!8m2!3d40.1802915!4d-6.6257026?hl=es&authuser=0>

We will work 5 hours a day, mainly in the mornings, having the rest of the day free to share with the Reforest-action family and to enjoy the activities we organize or to get to know Sierra de Gata.

We offer food and acomodotation, having a limited number of 30 beds, 15 of them in double and triple rooms for volunteers who decide to stay for several weeks and two rooms with bunk beds for those of you staying for a few days. Food is mainly vegetarian although on some days we will offer other options for dinosaurs.

Varied, tasty and quality food.

Please make your reservations as soon as you are clear as to when you are coming. Remember that places are limited.

On the weekends we will have open doors for anyone to join in, specially thinking on local people.

It is advisable that you bring sleeping bag, strong shoes, and raincoat.

We have tools and work gloves available. And we will try to have spare rain gear for those of you needing it.

The work we will be doing:

-Collecting seeds (acorns and chestnuts)

-Sowing acorns and chestnuts

-Tree planting

In case of strong rains the schedule may change or we may decide to do some other activity.

We have asked the Junta de Extremadura Nurseries for 50.000 trees.

They have initially accepted. We are doing the paper work in order to get them on the appropriate dates and we have 1200 other trees from a nursery in Merida.

All the trees we will plant are Autochthonous trees and our intention is to create Native Forests to diversify and enrich the landscape, working for the Health of our land.

We have already signed an agreement with the Council of Gata in order to reforest 30 hectares in this municipality and we are working on more agreements in other areas in the Sierra.

Animo and thanks for your support!!!
